To Whom It May Concern-

It is a privilege to write this letter of recommendation for Sandra Froonjian. As Supervisor of Science and Student Teaching for Stockton, I have observed and interacted with Sandra during her fieldwork and student teaching experience here at Mainland.

From her first day at Mainland, Sandra fit right in with faculty, staff and students. She always presented herself as a professional with both her attitude and interactions with all stakeholders in the school. During her time at Mainland, Sandra worked with Honors Biology level students as well as observing classes with students of different academic and social needs. She was always aware of things outlined in IEP's and 504 plans for her students in order to help them to overcome any possible difficulties or struggles in the school setting. She has worked to improve the skill of looking at the student as a whole person and creating connections with students that helps to enhance the classroom experience and achievement for her students. Sandra familiarized herself with Infinite Campus as a student information system in order to contact home, email parents, take attendance, and calculate student grades.

I would describe Sandra as someone who is always prepared and plans her lessons well. She utilizes technology as necessary and appropriate and creates well thought out questions that align with the standards as outlined by the State of New Jersey. Her classroom environment is one of mutual respect for both the teacher and students. Sandra is always willing to help in any way possible including covering teacher duty assignments as needed by the district.

Sandra will be an great addition to your school district. She is well rounded as an educator and will surely enhance your scholastic community. It is without reservation that I recommend Sandra Froonjian for employment as a teacher in your school district.

Sincerely,

Kristen Lavery

Supervisor of Math, Science, World Language, Performing Arts
